noted: 5/26/12/50

A diagram illustrating a two-antenna system. Two antennas, labeled 1 and 2, are positioned on the left. Antenna 1 is at the top, and antenna 2 is below it. Both antennas are represented by a vertical line with a funnel-shaped top. A reflecting surface, represented by a horizontal line, is located between the two antennas. Two arrows originate from the antennas and point towards a third antenna, labeled 3, which is positioned on the right. The arrow from antenna 1 is labeled α_1 and the arrow from antenna 2 is labeled α_2 . The arrows are labeled $\alpha_1 \cdot A$ and $\alpha_2 \cdot A$ near the third antenna. The third antenna is also represented by a vertical line with a funnel-shaped top.
